Information on REACH and RoHs

Our product range comprises flow and level measurement systems as well as data transmission units. We make every effort to provide high-quality, technologically leading and fully sustainable products to our customers.

Despite our best efforts, in certain parts of our products substances are used which are subject to the REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) Regulation.

As a user of semi-finished products we are a downstream user according to this regulation. This is why we regard it as our duty to monitor the REACH compliance of our suppliers. In this respect, we are actively monitoring the regular amendments of the REACH Regulation (VO (EG) Nr. 1907/2006) as well as the candidate list published by ECHA (European Chemicals Agency). The candidate list contains substances of very high concern (SVHC).

As soon as we obtain information on SVHC by our suppliers, we will immediately provide detailed information on the respective substances concerning our products likewise. SVHC contained in our products featuring a higher percentage by mass than 0.1 will be mentioned specifically.

If the availability of individual raw substances should be restricted due to REACH in the future we will look for REACH-compliant alternatives in close cooperation with our suppliers and will adjust the production accordingly within the scope of our possibilities.

With reference to Article 33 of the REACH Regulation please take note of the following (as of January 2019):

Substance	CAS No.	EG No.	Product
Lead	7439-92-1	231-100-4	CPC – Coupling of air filter with: POA – xxD/U KDA/O - xP CSM – xxD CS2 - xxD/U CSP- xxD/U

You can find more information and help under:
<http://www.reach-helpdesk.de/>

With the EU – Declaration of Conformity we confirm the RoHS conformity of our products. If you have any questions on REACH and RoHS we are happy to be at your disposal.
